Art Unit: 3744

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 1-4 and 8-11 are rejected under 35 U.S.C. 103(a) as being unpatentable over Raver et al in view of Saltzman et al. Raver et al discloses the claimed invention, including the ice storage unit 12 separately located from the ice maker 10, and the ice conduit 14 for driving ice therethrough by a driving force other than gravity. However, Raver et al does not disclose the condenser 18 located remotely from the evaporator. Saltzman et al teaches an ice maker system in which the condenser 87 is remotely located from the evaporator. It would be obvious to remotely locate the condenser 18 of Raver et al from the evaporator 22, in view of Saltzman et al, for the purpose of reducing noise coming from the condenser.

3. Claims 5-7 and 12 are allowed.

4. Applicant's arguments with respect to claims 1 and 9 have been considered but are moot in view of the new ground(s) of rejection.

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
